

# CORPORATE OVERVIEW

SmileTiger Software Corporation is the leader in real-time communications software for trainings and meetings on the Web. We develop and host products that enable end-users to share presentations, documents, applications, audio, and video spontaneously with anyone, anywhere, using Windows, Macintosh, Linux, or Solaris systems, all through a standard Web browser. Our products and services are used across the enterprise in online learning, sales, support, marketing, engineering, and various other functions.

SmileTiger Software Corporation proudly shipped her first product in 1999, and has local presence in United States, Canada, Germany, Finland, Sweden, China, and Singapore. Our customers are broadly located in North America, Europe, Asia, Australia, and South America.

# PRODUCTS AND SERVICES

SmileTiger WebPresentation is our flagship product. It features easy-to-use audio conferencing, video conferencing, remote PowerPoint presentation, whiteboard, application sharing, and many other real-time collaboration functions. This product is offered as server software, and it can be installed on Windows, Linux, Solaris, Mac, or mainframe machines.

ITalkAnywhere.com is our service hosting website. Customers can host their training courses, corporate conferences, and online support rooms here. This hosting service is built on SmileTiger WebPresentation server, and offers advanced account management service.

While the server product brings more security, lowers the cost and gives complete controllability, the hosting solution offers high performance network infrastructure and reduces your maintenance needs.

# ONLINE TRAINING

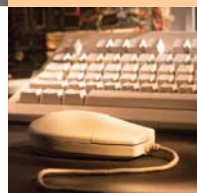

SmileTiger WebPresentation offers real-time collaboration functions and integrated document management for online training applications.

- Integrated audio, video, and instant message offer excellent interaction between instructors and students.
- Remote PowerPoint presentation and annotation provide instructors the main platform to teach.
- Whiteboard is used to draw complex content. It works perfectly with Tablet PC or tablet input devices for freehand writing.
- Application sharing lets instructions easily present applications on their computers.
- File pushing and Web tour let instructors easily distribute and present files in their local machines and on the web.
- Polling and Q&A offer richer interaction between instructors and students.
- MS Outlook integration enables instructors to conveniently schedule trainings and alert students before a training session getting started.
- Document center allows instructors to upload course materials in advance, and manage the materials on the fly during the training session.
- Recording and Streaming allow instructors to provide self-paced training option, or distribute the class archives after the training session.

# VIDEO CONFERENCING

SmileTiger WebPresentation offers exceptional video conferencing capabilities. Its high video quality, scalability, and N-to-N video communications are perfect for enterprise usage.

- Extremely high video quality: up to 1280 \* 1024 resolution and up to 30 frames per second.
- High scalability: videos can be broadcasted to thousands of users.
- N-to-N video: multiple users can send live video simultaneously in the same meeting room.
- Band width efficiency: advanced multicast technology and MPEG4 coding technology minimize the bandwidth requirements while keeping the high video quality.
- Video communications automatically pass firewalls and proxies with no configuration needed.
- Camera properties can be adjusted on the fly to get the best video result.
- Video windows can be flexibly positioned and resized.
- Video is seamlessly integrated with audio, PowerPoint presentation, and other real-time collaboration functions to build a complete training and meeting platform.
